INTERSPIRO July 07, 2008

ANNOUNCEMENT

BY-PASS VALVE SHAFT P/N 460 190 253 MODIFICATION

APPLIES TO

APPLIES TO INTERSPIRO TYPE S BY-PASSES

DESCRIPTION

Interspiro has received some field reports of leaking by-pass valves. The current by-pass is made of a glass filled nylon material and is 100% leak tested prior to shipment. A small portion of these by-pass valves have developed internal leakage a short time after entering service. This potential leak results in a very small leakage of air that goes through the breathing valve, into the mask and does not affect the function of the by-pass valve, however it may slightly reduce the duration of the SCBA.

In order to eliminate any possibility of the by-pass valve developing this internal leak the material in by-pass valve shaft has been changed from glass-filled nylon to aluminium.

ACTION

Until the end of December 2008 Interspiro is offering this new aluminium by-pass valve shaft at a reduced exchange price. The exchange offer is available as a one for one replacement for returned by-pass valve shafts that are leaking.

The new aluminium shaft can be ordered under P/N 460 190 253.

Contact your local Interspiro sales office for further information.

Note: Only holders of a valid Interspiro Service Certificate may perform the replacement of the by-pass valve shaft. After replacement of the by-pass valve shaft the unit must be tested on an Interspiro test bench.
