

INTERSPIRO

DIVATOR DP1 SURFACE SUPPLY

- ❶ No need for manual altering of pressure for various depths. Relieves the attendant's work load.
- ❷ The light and compact design allows rapid deployment when operating in remote or difficult terrain.
- ❸ The small diameter of the lightweight supply hose greatly reduces resistance in fast waters.
- ❹ The surface supply is simplified so that the attendant can focus on the safety of the diver.

DIVATOR DP1

SURFACE SUPPLY

DIVATOR DP1 features a unique patented supply hose solution and a surface supply dive control panel enabling rapid deployment in remote locations. DP1 is a surface supply dive system with a operating pressure of 4350 psi to the diver.

DIVATOR DP1 has two high-pressure connections, each to be connected to a high pressure supply cylinder or cylinder package. A shuttle valve makes it possible to change supply cylinder or cylinder package during the diving operation. The shuttle valve also includes a back pressure valve for the supply hose.

A standard **DIVATOR MK II** regulator can be used as a bailout apparatus. A **DIVATOR MK II BAILOUT** regulator is available. The **DIVATOR MK II BAILOUT** regulator is intended to be used when a direct warning of the surface supply failure is needed, so that full cylinders are available for decompression and/or extended time ascent.

Diving equipment from Interspiro is an investment with a long service life, when properly maintained. To simplify service and to obtain maximum product performance we recommend using our service kits, containing original spare parts necessary for preventive maintenance.

Interspiro offers training courses for users who perform day-to-day service work, as well as training for service personnel performing full maintenance programmes.

For more information about Divator DP1 and Interspiro diving equipment, visit us on the Internet.

REFERS TO PRODUCT(-S) WITH PART NO.(-S)

DP1, 36 ft	97 033-11
DP1, 200 ft	97 033-07
DP1, 230 ft	97 033-08
DP1, 298 ft	97 033-10
DP1, 396 ft	97 033-09

DP1 CONTENTS

- Automatic shuttle valve
- Primary pressure gauge
- Automatic audible alarm
 - Alarm sounds when pressure is down to 800 psi
- Back pressure valve for supply hose
- Sealed transport box
 - For dry stowage and easy transportation
- 2x high pressure hoses for connection of air banks
- Bleed valves
- Supply hose with anchoring device
- Regulator with quick coupling
- The supply hose is approved for 9 000 N / 2000 lbs.
- Belt and karabiner hook

DIMENSIONS AND WEIGHT

Surface panel box

Dimensions (h x w x d)	16.5 x 15.7 x 7.9 in.
Weight	10.8 lbs.

Supply hose

Diameter	0.394 in.
-----------------	-----------

OPTIONS

- Winding fixture (for the supply hose)
- Karabiner hook
- Belt
- Kit for modifying the reserve air valve to a bailout regulator
- Divator MKII Bailout regulator

APPROVALS

EC Council Directive (89/686/EEC)
Complies with applicable parts of EN 250
