QS HARNESS

REFERS TO PRODUCT(-S) WITH PART NO.(-S)
95100-series

QS HARNESS is designed for ultimate comfort and to reduce fatigue. The harness is heavily padded with wide shoulder straps. Both the shoulder straps and the hip belt are equipped with pivot mechanisms in order to increase the freedom of movement and for an ergonomic weight distribution. The double pivot mechanism design reduces shoulder strain, even while performing heavy physical activities such as climbing ladders.

The harness can be used with a single cylinder, twin cylinders or a cylinder pack. Kevlar and Nylon versions are available.

Breathing apparatus from Interspiro is an investment with a long service life, when properly maintained. To simplify service and to obtain maximum product performance we recommend using our service kits, containing original spare parts necessary for preventive maintenance.

Interspiro offers training courses for users who perform day-to-day service work, as well as training for service personnel performing full maintenance programmes.
