DIVATOR HATCH

AMBIENT BREATHING VALVE

- ❶ **The perfect companion to the best full face mask for professional divers**
- ❷ **Provides ambient breathing at surface level**
- ❸ **Easy push - pull operation**
- ❹ **Built-in check valve directs air to reduce visor fog and CO² level**

DIVATOR HATCH

AMBIENT BREATHING VALVE

The **DIVATOR HATCH** consists of the ambient breathing valve mounted on the visor, the visor is hard coated and anti-fog prepared.

The **DIVATOR HATCH** is an easy-to-use enhancement to the **DIVATOR MASK**.

The **DIVATOR HATCH** is attached to the side of the **DIVATOR MASK** – not interfering with the field of vision – and gives the diver ambient air while on standby or at surface level.

The **DIVATOR HATCH** is designed with Interspiro's safety innovation pedigree. The Hatch is easy to operate: pull to open and push to close.

The **DIVATOR HATCH** has a small form factor and will not hamper the diver above or under water. The design of the breathing valve keeps the breathing resistance extremely low. Ambient breathing will not only increase cylinder duration time but will enable the diver to keep the face mask donned while on standby.

DIVATOR HATCH is the perfect companion to the Worlds greatest full face mask for professional Divers.

Diving equipment from Interspiro is an investment with a long service life, when properly maintained. To simplify service and to obtain maximum product performance we recommend using our service kits, containing original spare parts necessary for preventive maintenance.

Interspiro offers training courses for users who perform day-to-day service work, as well as training for service personnel performing full maintenance programmes.
