

## DIVATOR REGULATORS

### DIVATOR MKII

- ❶ Approved for use in cold waters
- ❷ Chest mounted reserve valve and surface supply connection
- ❸ The function of the reserve valve can be checked pre-dive
- ❹ The reserve valve is self-resetting at pressures above 100 bar
- ❺ Quick connection for external air source such as surface supply
- ❻ The design and placement of the pressure gauge makes it easy to read
- ❼ Bail out function is available as optional feature

# DIVATOR REGULATORS

The **DIVATOR REGULATOR** is available in a variety of versions.

## REGULATOR OPTIONS

Regulator type	Warning Active	Warning Passive	Dive Type	Environmental conditions
Divator MKII with warning	65 bar	Pressure gauge	Autonomous /Surface supply	Ice/ Normal
Divator MKII w/o Warning	No*	Pressure gauge	Autonomous /Surface supply	Ice/ Normal
Divator MKII Bail Out**	300 bar	Pressure gauge	Surface supply/Deco	Normal

\* Active warning can be added by using the Interspiro Divator HUD.

\*\* Interspiro Bail Out regulator is intended to be used when a direct warning of the surface supply failure is needed, so that full cylinders are available for decompression and/or extended time ascent. After the user switches from surface supply to the bail out full cylinder supply, there is no other additional active warning.

Interspiro Bail Out regulator is not recommended for use in autonomous dives unless the Interspiro Divator HUD is added.

Interspiro strongly disadvises the user to perform decompression dives during extreme cold diving conditions.

Diving equipment from Interspiro is an investment with a long service life, when properly maintained. To simplify service and to obtain maximum product performance we recommend using our service kits, containing original spare parts necessary for preventive maintenance.

Interspiro offers training courses for users who perform day-to-day service work, as well as training for service personnel performing full maintenance programmes.

**For more information about the DIVATOR product range and our other diving equipment please visit us on the Internet.**

## REFERS TO PRODUCT(-S) WITH PART NO.(-S)

## ABBREVIATION CODING

Reg = Regulator                      RV = Reserve Valve  
 BOV = Bail Out Valve              Sw = Swivel, 4 ports  
 HUD = Heads Up Display

## ACCESSORIES

- Heads Up Display (HUD) with warning at 55 bar (part no. 89100-04)
- Dry suit hose (part no. 97 474-03)
- BC hose (part no. 336 291 131)
- Secondary breathing valve (part no. 97 199-01)
- Octopus hose 1.7 m (part no. 99 007-01)

The new **DIVATOR PRESSURE GAUGE** is developed according to EN250:2000 with a lot of improved features.

One is a reduced risk for leakage. The rubber cover and house assembly is designed to absorb shock on impact. It is also easier to get a firm grip of the new rubber cover. Additionally the accuracy of the pressure gauge is improved.
