

DIVATOR HARNESS

- ❶ Ergonomic design for best weight distribution of the cylinder pack
- ❷ The ribbed back plate keeps the diving apparatus in a fixed position close to the diver
- ❸ Super elastic material in the back plate makes it virtually unbreakable, even in low temperatures
- ❹ High safety even without back plate with the integrated stainless steel frame
- ❺ Lockable and adjustable belt buckles with quick release function

DIVATOR HARNESS

REFERS TO PRODUCT(-S) WITH PART NO.(-S)
336 190 975

The **DIVATOR HARNESS** is ergonomically designed and takes the weight load from the cylinder pack off the shoulders and instead spreads the weight evenly out on the divers back. The belt coupling has a quick release function and is self centering which makes the belt coupling easy to find.

The ribs on the back plate keep the diving apparatus close to the diver. This stable design facilitates any type of diving.

It is easy to mount and dismount the cylinder pack to the harness. It requires no tools.

Diving equipment from Interspiro is an investment with a long service life, when properly maintained. To simplify service and to obtain maximum product performance we recommend using our service kits, containing original spare parts necessary for preventive maintenance.

Interspiro offers training courses for users who perform day-to-day service work, as well as training for service personnel performing full maintenance programmes.

For more information about the DIVATOR product range and our other diving equipment please visit us on the Internet.

MATERIALS

Harness frame	Stainless steel
Backplate	Thermoplastic rubber (flame proof)
Straps	Polyester webbing
Buckles	Stainless steel / polyamid
