Lifetime Extended to 8 Years for DP1 Surface Supply System, High Pressure Lifeline Hose

LIDINGÖ May 25, 2008

ANNOUNCEMENT

Interspiro announces an extension of the recommended operational lifetime of the High Pressure Lifeline Hose, 300 bar used with the DP1 Surface Supply system.

APPLIES TO

All supply hoses, 300 bar, that are included in versions of the following products:

96116 High Pressure Lifeline Hose, 300 bar

99086 Supply Hose/Lifeline, 300 bar

96725 High Pressure Supply Hose, 300 bar

DESCRIPTION

The Surface Supply System DP1 has now been in use by professional divers around the world for more than five years. The DP1 Surface Supply System has performed according to highest expectations during thousands of dives, sometimes under exceedingly demanding conditions.

Based on our present experiences from the installed user base of Surface Supply Units during thousands of dives combined with data from our spot checks of equipment in use, Interspiro now announces the extension of the recommended lifetime of the High Pressure Lifeline Hose **from six (6) to eight (8) years.**

Note! This extended lifetime applies only to the high pressure hoses listed above and under the provision that the hoses are used, maintained and inspected according to the current Interspiro User Manual.
